comment is one of satisfaction that the long expected attack has finally began and there is complete confidence regarding the outcome.

The Lokal Anzeiger reproduces the views held in official quarters where this offensive is regarded as having already failed. It is also pointed out officially that the necessary reserves have been brought up in time at the threatened points and that there is no prospect of the Anglo-French breaking the German lines.

It is added that the French and British suffered heavy losses, especially the latter at Loos and that not the slightest ground for anxiety exists. Regarding further developments, German officials expect that the attacks will continue to be violent in character for several days, but they declare that the ultimate purpose of breaking the German lines can already be set down as an impossibility. The Kreuzzeitung says that "the French and British reported successes bring the enemy no nearer to Paris, Sept. 28.-Notwithstanding their object of breaking the German

Petrograd. Sept. 21-via London-The German aggressive on the eastern front has become noticeably weaker during the past few days. At the same time the Russian opposifion with the replenishment of the army's military supples is growing daily more stubborn.

During the last few days their greatest efforts have been made in the vicinity of Lake Drisitiata, directly south of Dvinsk, where Gen. Ruzky threw them back from the town of that name

The Russian staff has information that the Germans have undertaken a new grouping of their forces for an extensive flanking operation from the direction of Novo Grodek, southeast toward Nesige and Sltusk, on the highway to Bobrysk, the principal crossing of the great Beresina between Borizow and the Junction of the Beresina and Dnieper.

From Lida and the Gawia river the Germans have succeeded in moving castward to the village of Idie where they brought heavy artillery into action. This put a stop to the progress of the Russians toward the village of Podgurie.
